

# Class

module.exports() => ( **HTML** )

This is the template for each class, displayed on the "Classes" page.

**Kind:** Exported function

Param	Type	Description
props.class_path	string	The website path to go to the class page.
props.image_path	string	The link for the class image.
props.class_name	string	The class name.

## Code

```
/**
 * @module Class
 */
import "./style.css"
import { Link } from "react-router-dom"

/**
 * This is the template for each class, displayed on the "Classes" page.
 * @function
 * @param {string} props.class_path The website path to go to the class page.
 * @param {string} props.image_path The link for the class image.
 * @param {string} props.class_name The class name.
 * @returns {HTML}
 */
export default function Class(props){
  return(
    <Link className="class" to={props.class_path || "/"}>
      <img src={props.image_path || "https://via.placeholder.com/100x100"}
alt="class avatar" />
      <h2>{props.class_name || "Year 11"}</h2>
    </Link>
  )
}
```
